CAPILLARY DISPLACEMENT OF PETROLEUM FROM ATURAL CORES BY WATER. [1960] 9p. 7 refs.
Order from LC or SLA mi$1.80, ph$1.80 60-16961

Trans. of Moskovskiy Neftyanyy Institut. [Trudy] (USSR) [1958] v. 22. p. 198-206.

Experiments on capillary petroleum displacement from natural sandstones by water show, that independently of the presence or absence of residual water in the core, a capillary penetration of water into the core and a petroleum displacement are observed at its contacting with the displacing water medium. The rate of capillary petroleum displacement depends on the quality of the displacing water and on the quantity of the residual water in core. (Author)
